

Need help with buying a boat privately?

We are aware that we might not have on our brokerage the boat you require and there are a lot of private sellers advertising these days. From our experience one should be cautious buying privately as normally the correct paperwork is not issued, checks are not made and surveys not taking place.

After many sad stories we decided to set up this service to be able to help, guide and make sure all sales are completed successfully and most important of all keep your money safe in our designated clients account.

If you have found the perfect boat and are buying privately we can assist with the following services:

- Advice on all aspects of purchase, including survey, legal transfer of ownership, insurance and finance
- Provision of industry standard documentation, particularly Sales Agreements and Bills of Sale
- Facility to securely hold funds in our dedicated clients account
- Bespoke service – as much or as little as you want, priced accordingly

This services is paid by the buyer and no owner should have any issues with you using this service. If they do, please think twice!

For further details please enquire.
