HISTORY

The Wind In The Willows is a 70ft traditional stern narrowboat built by Evans & Sons in 1998. She features a traditional fit-out with warm mahogany-coloured woodwork and a large, spacious saloon, creating a comfortable and welcoming interior.

In 2021, the hull was grit blasted and treated with epoxy. A new gas locker was also fitted and epoxy treated, and new anodes were installed. The most recent hull survey was carried out in 2026.

The boat is equipped with an Electrolux Travel Pack and solar panels, which were newly installed in 2018.
